

# ReTraze<sup>®</sup> visor material

ReTraze<sup>®</sup> collaborates with small businesses, fishermen, and NGOs to collect discarded fishing nets and transform them into 100% recycled PE. Since 2016, ReTraze<sup>®</sup> has been actively involved in collecting these abandoned fishing nets.

Through years of meticulous research and continuous improvements, they have established a vertical supply chain that effectively converts discarded fishing nets

into 100% recycled PE ReTraze<sup>®</sup> fishing net panels. The recycling process employed by ReTraze<sup>®</sup> involves physical methods, including sorting, cutting, washing, melting, chipping, extrusion, and precision cutting. Through their efforts, they not only reduce waste, but also create a product that stands testament to the potential of responsible recycling.
