

**PT904** | 4033**Ultimate Print Supersoft 4033 Matt**

100% Polyurethane

Roll Length: 25m x Roll Width: 0,5m

Poli-Flex

STANDARD

Technical data - Transfer film: polyurethane, cast/Adhesive: polyurethane-hotmelt/Thickness [mm]: 0.05 +/- 10%/(Standard) liner: PET film, non-adhesive | Transfer conditions - Temperature: 160°C/Pressure: 2.5–3.0 bar [medium pressure]/Time: 15 sec. | The PET liner should be removed warm | Wash resistance: 40°C/Use only colour-safe and mild detergents/Wash textiles inside out/Suitable for tumble drying | Printing: True sided | ULTIMATE PRINT SUPERSOFT 4033 MATT is a heat-sealable, printable PU textile transfer film (opaque white, 50 µ) suitable for light and dark textiles. | Due to a special top coat, the film offers excellent wash resistance. | ULTIMATE PRINT SUPERSOFT 4033 MATT offers a high print resolution with a semi-matt finish and has a pleasantly soft textile feel. | ULTIMATE PRINT SUPERSOFT 4033 MATT is compatible with all current inkjet printers using ECO-solvent, solvent and latex inks. Due to a newly developed, non-adhesive PET film liner, even very small letters and motifs can be easily cut by a CAD/CAM plotter after the printing process and subsequently weeded. | We recommend the use of POLI-TACK 853 + 854 + 870 for transfer and as a protective cover during hot transfer. | The transfer film is used for motifs and logos on sport, leisure and work wear. | Fabrics that have a water-repellent finish or waterproofing are not suitable for heat transfers. | The raw materials used are not harmful to the environment and are free from PVC, plasticisers and heavy metals. | We recommend carrying out an application test on original materials. | Due to the various influences resulting from the production and transfer of the transfer film, the nature of the materials and the washing and cleaning conditions, product liability can only apply to unprocessed materials.
