

**PT951** | 5901**Subli-Flock 5901**

100% Polyester

Roll Length: 25m x Roll Width: 0,5m

Poli-Tape Flock

WHITE

Technical Data - Transfer Film: Polyester flock/Adhesive: Copolyester-hotmelt/Thickness [mm]: 0.64 +/- 10%/Liner: Silicone paper, white | Transfer conditions - Temperature: 160°C/Pressure: 2.5–3.0 bar [medium pressure]/Time: 15 sec. | Application: Print transfer paper with sublimation ink (mirror-inverted)/Place the sublimation paper on the flock and transfer the motif using a heating press set at 185°C, applying medium pressure (2.0 bar) for 40–45 seconds. /Press the printed flock onto the textile, following the specified transfer guidelines | Wash resistance: 60°C/Use only colour-safe and mild detergents/Wash textiles inside out/Suitable for tumble drying | Printing: indirectly using transfer paper | Heat-sealable Polyesterflock (white), with excellent results with dye-sublimation transfer-printing. | The liner on the hotmelt side allows motifs and logos to be cut by all current CAD/CAM plotters after printing. The flock offers excellent weeding properties. | Suitable for printing motifs and logos on sport, leisure and work wear. | The high fibre density ensures bold, brilliant colours are retained during printing. | The polyester flock has excellent resistance to yellowing. | Fabrics that have a water-repellent finish or waterproofing are not suitable for heat transfers. | We recommend carrying out an application test on original materials. | Due to the various influences resulting from the production and transfer of the transfer film, the nature of the materials and the washing and cleaning conditions, product liability can only apply to unprocessed materials.
